### **NOTES TO EDITORS**

#### **About Flow Traders**

Flow Traders is a leading technology-enabled liquidity provider operating on a global scale that specialises in ETPs. We provide liquidity in ETP markets 24 hours a day while seeking to stay market neutral at all times and without having directional opinions. While we do not have any clients, we enable investors to buy and sell ETPs efficiently by quoting bid and ask prices. We seek to earn small amounts of money on large numbers of individual transactions based on the differences between our ETP prices and the prices of the underlying or related instruments. Investors benefit from our activities due to increased liquidity, higher execution quality and lower overall trading costs. As such, we contribute to more efficient and transparent securities markets. We provide liquidity in over 4,000 ETP listings across the globe, tracking all underlying asset classes including equities, fixed income, commodities and currencies with access to 94 exchanges in 32 countries. Flow Traders is headquartered in Amsterdam, the Netherlands, with trading offices in Asia and the US covering all time zones. Flow Traders' shares are listed on Euronext Amsterdam (symbol: FLOW).
