Forward looking statements are statements that are not historical facts, including statements about our beliefs and expectations. Financial objectives are internal objectives of Flow Traders to measure its operational performance and should not be read as indicating that Flow Traders is targeting such metrics for any particular fiscal year. Flow Traders' ability to achieve these financial objectives is inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond Flow Traders' control, and upon assumptions with respect to future business decisions that are subject to change. As a result, Flow Traders' actual results may vary from these financial objectives, and those variations may be material.

Efficiencies are net, before tax and on a run-rate basis, i.e. taking into account the full-year impact of any measure to be undertaken before the end of the period mentioned. The expected operating efficiencies and cost savings were prepared on the basis of a number of assumptions, projections and estimates, many of which depend on factors that are beyond Flow Traders' control. These assumptions, projections and estimates are inherently subject to significant uncertainties and actual results may differ, perhaps materially, from those projected. Flow Traders cannot provide any assurance that these assumptions are correct and that these projections and estimates will reflect Flow Traders' actual results of operations.
